Permit Descriptions

<u>CAFRA</u> - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

<u>Federal Consistency Activity</u>: Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

Flood Hazard Area: A Flood Hazard permit or verification is required for disturbances within the floodway or floodplain in areas regulated under the Flood Hazard Area Control Act.

<u>Freshwater Wetlands</u>: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas. A Flood Hazard Area Permit, an U.S. Army Corps of Engineers Dredge and Fill Permit, and a Water Quality Certification may also be required.

<u>General Groundwater Petroleum Products Cleanup</u>: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwater, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities, which require a permit, may be found at N.J.A.C. 7:14A-2.4)

Solid Waste Facility: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

Highlands Resource: A Highland Preservation Area Approval is required for regulated activities within the Highland Preservation Area as defined in the Highlands Water Protection & Planning Act Preservation Area Rules. Highlands Applicability Determinations verifies certain exemptions allowed by the regulations.

<u>Tidal Wetlands</u>: A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

<u>Treatment Works Approval</u>: A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

Waterfront Development: A permit is required for any project involving the development of waterfront near or upon any tidal or navigable waterway in the State.

Coastal Wetlands: A permit authorizing disturbances to Mapped Tidal Wetlands under the Wetlands Act of 1970, N.J.S.A. 13:9A"

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA). In addition, this publication lists status of Highlands application and Highlands Applicability Determinations.

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

<u>Public Hearings</u> are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

<u>Contested Case Hearings</u> are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

<u>DEP Events of Public Interest</u> include public hearings, council meetings, workshops, public information meetings, and exams.

Appeals on Applications

Any individual who would like to appeal a decision on an application should direct their remarks to:

NOTICE OF SETTLEMENT AND PERMIT ISSUANCE FRESHWATER WETLANDS PROTECTION ACT

TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION has settled with Bi-County Development Corp (Bi-County). (Bi-County owns real property designated as Block 3001,Lots 1, 4, 15 and 18 (formerly designated as Block 3102 Lot 1 and part of Lot 3; Block 3101 Lots 3 and 6; Block 3103 Lot 1; and Block 3103 Lot 2, respectively) on the tax maps of the Borough of Oakland, Bergen County, New Jersey, the "Property".) Notice of the Intent-To-Settle appeared in the DEP Bulletin on April 2, 2014, Volume 38 Issue 7, and this notice finalizes the Intent-To-Settle.

The Settlement anticipated the now-issued Freshwater Wetland General Permits 10B and 11, as well as a Transition Area Waiver (PI0000-03-0013.4, FWW130001, FWW070002, and FWW070004, respectively, issued on January 26, 2015). These wetlands permits and wetlands transition area waiver include a Comprehensive Conservation Plan designed to protect the documented barred owl habitat and Exceptional Value Resource Wetlands on the Property.

Previously, on February 9, 1987, Bi-County filed a Mount Laurel affordable housing suit against the Borough of Oakland, captioned Bi-County Development Corp. v. Bor. of Oakland, Docket No. L-0228851-87-PW, seeking a builder's remedy authorizing construction of residential units on the Property, including affordable low and/or moderate-income households. On January 14, 1991 Bi-County and Oakland entered into a Settlement Agreement which resolved the builder's remedy suit by requiring Oakland to rezone the Property to permit construction of an inclusionary housing development. This Settlement Agreement recognized the provision of sewer service as a vital ingredient for the court ordered constitutionally required affordable housing development. The 1991 Settlement Agreement for the affordable housing obligated Oakland to cooperate and expeditiously resolve any issues regarding sewer service, and acknowledged that Oakland had, consistent with this obligation, submitted to the Department a Wastewater Management Plan (the "1990 Oakland WMP") to authorize sanitary sewer service, for the affordable housing project ordered by the Superior Court, via a connection to the municipal system operated by the adjacent Township of Wayne.

In response to the 1990 Oakland WMP, the Department placed the Property in an approved sewer service area for Wayne's Mountain View Wastewater Treatment Facility as part of the Department's February 4, 1991 adoption of the 1990 Oakland WMP, which was an amendment to the Northeast Area-wide Water Quality Management Plan ("Northeast WQMP), see 23 N.J.R. 910 (March 18,1991), an amendment which was never revoked.

In 2004, the Legislature adopted the Highlands Water Protection and Planning Act, N.J.S.A. 13:20-1, which included various exemptions from that statute. Bi-County sought an exemption and in 2005, the Department determined the affordable housing project met the parameters under N.J.S.A. 13:20-28(a)17, a determination which is presently under third-party appeal by Oakland. In its 2005 Highlands Act exemption determination, the Department further determined the project was inconsistent with the Northeast WQMP, but did so without Bi-County or the Department identifying or considering the pre-existing 1990 Oakland WMP and 1991 WQMP amendment. Thereafter, again without consideration of the 1991 WQMP amendment, in 2008 the Department disapproved the WQMP amendment and Bi-County appealed to the Office of Administrative Law. In light of the 1991 WQMP amendment which was never revoked, and the June 2005 inconsistency determination which would not have been issued had Petitioner identified and the Department considered the 1990 Oakland WMP, further amendment to the Northeast WQMP is not required to support issuance of permits for the Project, and this settlement supersedes and rescinds the 2005 inconsistency determination and the 2008 WQMP disapproval.

In 2007 the Oakland Planning Board granted preliminary and final site plan approval for 209 dwelling units, subject to all needed approvals by the Department. The Department approvals include delineation of an approved freshwater wetlands transition area buffer line and wetlands review and approval of the location of the road, either of which may still require an amended municipal site plan approval.

Further, as Bi-County was unable to proceed under its November 2007 Stream Encroachment permit due to the incorrect WMP inconsistency determination; the Department is tolling that permit's approval for the pendency of the administrative appeal. The tolling for the stream encroachment permit ends upon publication of this notice. Bi-County must obtain all other approvals required by local, state or federal law.

COASTAL GENERAL PERMIT 9, COASTAL GENERAL PERMIT 14, WATERFRONT DEVELOPMENT INDIVIDUAL PERMIT, AND COASTAL WETLANDS PERMIT APPLICATION

TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION intends to enter into a Settlement Agreement and issue a Coastal General Permit 9, Waterfront Development Individual Permit, and Coastal Wetlands Permit (Authorizations) that would resolve the appeal of Coastal General Permit 9, Coastal General Permit 14, Waterfront Development Individual Permit, and Coastal Wetlands Permit #0506-07-0009.1 CAF120001, CAF120002, WFD120001, CSW120001. Said Authorizations would authorize reconstruction and expansion of single-family dwelling, in-kind bulkhead replacement and the filling of 716.6 sq. ft. of coastal wetlands. The Authorizations will be issued pursuant to the Rules on Coastal Zone Management (N.J.A.C. 7:7E-1.1 et seq.) and the Coastal Permit Program Rules (N.J.A.C. 7:7-1.1 et seq.). The project is shown on one sheet entitled, "Gligor Residence, Proposed Single Family Dwelling, Block 17, Lot 3, Middle Twp., Cape May Co., New Jersey," dated July 20, 2014, last revised December 16, 2014 and prepared by Robert Douglas Green, P.E. The applicants are Nicholas and Joyce Gligor. Notice of the final decision will appear in the DEP Bulletin under the section entitled Division of Land Use Regulation.

IN THE MATTER OF: Nicholas and Joyce Gligor

Notice of Public Comment Period Regarding Site Specific Water Quality Management Plan Amendment Applications Pursuant to P.L.2013, c.188

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Water Resource Management Coordination, has received the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2013, c.188. P.L. 2013, c.188 directs the Department to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2013, c.188, notice of site specific amendments for projects or activities having a wastewater

planning flow of less than 20,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notice of site specific amendment proposals for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below.

An appointment to review the file for any of the proposals may be arranged by calling the Office of Water Resource Management Coordination at (609) 777-4349. The Department's file is available for inspection between 8:30 a.m. and 4:00 p.m., Monday through Friday at 401 East State Street, Trenton, New Jersey.

Interested person may submit written comments on any of the proposals. When providing comments, specify which proposal the comments are being provided for. All comments must be submitted within 30 days of the date of this public notice to the address cited below. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request that the Department hold a non-adversarial public hearing or extend the public comment period up to 30 additional days for any of the proposals. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. The requests must be submitted within 30 days of the date of this public notice to the address cited below. If a public hearing is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

Written comments should be submitted to:

Colleen Kokas, Director Office of Water Resource Management Coordination Mail Code 401-02A PO Box 420, 401 East State Street Trenton, New Jersey 08625-0420

Notice(s) of site specific proposals that qualify for review under P.L. 2013, c. 188 are individually provided below:

OFFICE OF WATER RESOURCES MANAGEMENT COORDINATION Proposed Amendment to the Ocean County Water Quality Management Plan Public Notice Toms River Senior Affordable Apartments

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Ocean County Water Quality Management (WQM) Plan. This amendment proposal, entitled "Toms River Senior Affordable Apartments", submitted on behalf of Toms River Township, would expand the Ocean County Utilities Authority (OCUA) sewer service area (SSA) to allow for the construction of an apartment complex. This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L 2013, c.188. This preliminary notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15.

The proposed project site is located in Toms River Township, Ocean County on Block 166, Lots 2 and 10. This amendment would allow for the construction of 102 age-restricted apartment units with a total of 94 one-bedroom apartments, 8 two-bedroom apartments, and a clubhouse/rental office on the above referenced parcel. The projected wastewater flow for the proposed new development, calculated in accordance with N.J.A.C. 7:14A-23.3, is 12,227.5 gallons per day (gpd).

The currently adopted SSA excludes a significant portion of the above referenced property due to the presence of a Special Water Resource Protection Area (300-foot buffer) on the Slab Branch, a Category One Tributary to the Toms River, which had been mapped as being located on the property. A site investigation by the Department's Division of Land Use Regulation (DLUR) on August 19, 2014 determined that the Slab Branch does not, in fact, exist on the property and had been mapped incorrectly. The report found that the Slab Branch actually terminates south of the proposed project site. On October 3, 2014 DLUR issued a Flood Hazard Applicability Determination ("jurisdictional determination"), under file No. 1507-11-0006.1 APD 140001 for the proposed project. This determination stated that: "...the Department has determined that the proposed project activities are located outside of the assumed flood hazard area and riparian zone of the nearest regulated waterway (a tributary to the Toms River named Slab Branch). Therefore, the formal authorization for the proposed project is not required under the Flood Hazard Area Control Act Rules."

While the field verified location of the Slab Branch is not located on the property, a portion of its 300 foot buffer area still extends partially onto the proposed project site. This area will still remain excluded from the SSA. No sewage producing structures are proposed for this portion of the property.

Of Block 166, Lot 2 and 10's total of 11.19 acres, the portion proposed to be added to the SSA is 1.9 acres specifically on Block 166, Lot 10, a 3.61 acre tree conservation area, a wetlands and wetlands buffer area and the above referenced 300 foot riparian buffer will remain outside of the SSA. These areas may be subject to a conservation deed restriction to meet mitigation requirements for impacts to critical wildlife habitat.

As outlined at N.J.A.C. 7:15-5.24, sewer service may only be provided to areas that are not identified as environmentally sensitive areas (ESAs), Coastal Fringe, Coastal Rural and Coastal Environmentally Sensitive Planning Areas, beaches, coastal high hazard areas, and dunes. Pursuant to N.J.A.C. 7:15-5.24, ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. Aside from a portion of the 300 foot buffer associated with the Slab Branch that extends partially onto the proposed project site, as noted above, and wetlands, there are no other environmentally sensitive areas identified on the parcel.

Pursuant to N.J.A.C. 7:15-5.24(c), certain coastal planning areas, not applicable here, must also be excluded from SSA. Specifically, there are no Coastal Fringe Planning Areas, Coastal Rural Planning Areas, or Coastal Environmentally Sensitive Areas on the project site.

In accordance with N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers are excluded from the adopted SSA either where local mapped information exists delineating these areas, or through a narrative description where mapping does not exist, except as provided under N.J.A.C. 7:15-5.24(f)1. Where a narrative approach has been used, it is noted as text on the adopted FWSA map. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of these amendments and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations that prohibit the extension of sewers identified under N.J.A.C. 7:15-5.24(d)1, there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project has been evaluated. The Department has determined that the OCUA Central Wastewater Pollution Control Facility has adequate available capacity to treat the proposed wastewater flow from this project.

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. Water supply for the proposed development will be provided by the United Water Toms River which is a public water system which withdraws water from the Kirkwood Cohansey and Atlantic City 800 foot Sands Aquifers. The location of the diversion is Toms River and the water allocation permit number is WAP1507005. The existing water allocation permit will not require modification to serve the proposed project

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The county and local governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Toms River Township has an adopted stormwater management ordinance (No. 4060-06) which complies with the performance standards of the Stormwater Management Rules at N.J.A.C. 7:8.

In accordance with N.J.A.C. 7:15-5.25(h)5, the proposed project is not located in the riparian zone. As noted above, a portion of the 300 foot buffer associated with the Slab Branch extends partially onto the proposed project site. This area will still remain excluded from the SSA. No sewage producing structures are proposed for this portion of the property.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h), or unless a site has undergone a site specific Habitat Suitability Determination prepared in accordance with N.J.A.C. 7:15-5.26 that found the site to be not suitable habitat, or pursuant with N.J.A.C. 7:15-5.24(g)2, the Department determined the ESA is not critical to a population of endangered or threatened species the loss of which would decrease the likelihood of the survival or recovery of the identified species. Review of the project site has determined that no threatened or endangered species habitat exists on site.

The Department also reviewed Critical Wildlife Habitat (CWH) as part of a CAFRA permit review in accordance with N.J.A.C. 7:7E-3.39. CWH are specific areas known to serve an essential role in maintaining wildlife, particularly in wintering, breeding and migrating. The Department considers patches of woody vegetation along the Atlantic seaboard to serve a critical role in providing resting and foraging habitat for migratory birds. Within the coastal zone mainland, patches of woody vegetation equivalent to 20 acres in size, and greater, function as migratory bird stopover habitat.

The proposed project site is located within a large woodland complex that was determined to be in excess of 20 acres through an analysis of current aerial photography and Land Use Land Cover mapping. As a result, the associated woody community exceeds the minimum patch size identified as a characteristic of migratory songbird habitat and the applicant must conduct mitigation to offset their impact on CWH. The Department has determined that the applicant may possibly be able to address CWH mitigation needs entirely onsite. The placement of a conservation deed restriction on the above referenced tree preservation area as well as the

wetlands, wetlands buffer areas, and riparian buffer area, would result in adequate onsite mitigation for the direct loss of 3.5 acres of CWH.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

A Riparian buffer zone, as described above has been identified on the property. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. To become compliant, and in accordance with N.J.A.C. 7:15-5.25(h)5i, the Riparian Corridor Analysis has been satisfied by applying the 300 foot buffer to the applicable portions of the Slab Branch, and the exclusion of the buffer area from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, a Letter of Interpretation: Line Verification File # 1507-11-0006.1, FWW140003, a Freshwater Wetlands General Permit #11 FWW140001 and a Wetlands Transition Area Waiver Averaging Plan FWW140002 are currently under review by the Department, confirming that the extent of wetlands and transition area are accurately delineated on the proposed project activity site and confirming that the proposed project meets the requirements for approval to disturb regulated areas pursuant to N.J.A.C. 7:7A-4.3, 5.11, 6.2 and 13.1. The provisions at N.J.A.C 7:15-5.24(b)4, have been satisfied by the exclusion of the wetlands areas from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope greater than 20 percent. There are no steep slopes on the subject site.

Additional issues which may need to be addressed for any new or expanded wastewater treatment facility proposal include, but are not limited to, compliance with stormwater regulations, antidegradation, effluent limitations, water quality analysis, and exact locations and designs of future treatment works. Additionally, sewer service to any particular project is subject to contractual allocations between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

This notice is being given to inform the public that a plan amendment has been proposed for the Ocean County WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Department, Office of Water Resources Management Coordination, 401 East State Street, P.O. Box 420, Mail Code 401-07A, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resource Management Coordination at (609) 777-4349.

Interested persons may submit written comments on the proposed amendment to WQM Program Docket, at the Department address cited above, with a copy sent to Ms. Edmond Speitel, Speitel and Speitel Inc, 2 Eastwick Drive – Suite 102, Gibbsboro, NJ 08026. All comments must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment proposal.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this notice to WQM Program Docket at the Department address cited above. If a public hearing for the amendment is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

OFFICE OF WATER RESOURCES MANAGEMENT COORDINATION Proposed Amendment to the Tri-County Water Quality Management Plan Public Notice:

Woodcrest

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Tri-County Water Quality Management (WQM) Plan. This amendment proposal, submitted on behalf of Cherry Hill Land Associates, LLC, would return approximately 99.96 acres located on Block 528.01, Lot 11 in Cherry Hill Township, Camden County to the sewer service area (SSA) of the Camden Municipal Utility Authority's Delaware No. 1 Water Pollution Control Facility (WPCF) (#NJ0026182).

This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules, N.J.A.C. 7:15-1 et seq. and P.L. 2011 c.203 as amended and supplemented by P.L. 2013 c.188. Section 6(h) of P.L. 2013, c. 188 allows for the consideration of an application for a WQM Plan amendment that does not propose a specific project or activity and delineates as SSA a parcel not to exceed 100 acres in size that complies with the regulatory criteria for the delineation of a sewer service area established at N.J.A.C. 7:15-5.24.

In accordance with N.J.A.C. 7:15-5.24 environmentally sensitive areas (ESAs) are assessed to determine what areas of the property are appropriate for inclusion in the proposed SSA. ESAs are defined based on a composite geographic information systems (GIS) analysis, as any contiguous area of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination, ESAs are required to be excluded from the SSA.

As identified in the previously approved Camden County Municipal Utility Wastewater Management Plan (WMP) the entirety of Block 528.01, Lot 11, an approximately 183 acre property, was within the SSA. This property is the location of the Woodcrest Country Club and 18 hole golf course. As superseded by the Camden County Future Wastewater Service Areas (FWSA) Map, adopted on June 18 2013, only approximately 20 acres of land surrounding the club house facilities were retained as SSA. Portions of the previously approved SSA were removed pursuant to N.J.A.C. 7:15-5.24 based on the presence of wetlands as mapped by the Department's GIS analysis that indicated there was a contiguous area greater than 25 acres. The remaining area was removed from the SSA as a result of the initial draft proposed state-wide SSA as provided by the Department to County WMP agencies participating in the WQMP planning process for use in the development of their county wide WMP.

As stated above, each WMP agency participating in the WQMP planning process was contacted by the Department via written correspondence that included an electronic copy of the GIS shapefile of a first draft of the proposed SSA. This correspondence noted that the GIS SSA mapping coverage provided was intended

as the starting point from which the County should begin discussions with the municipalities to refine the draft SSA. This initial working draft supplied to the County WMP agencies removed SSA from golf course playing areas. As part of process for the development of the FWSA map, SSA could be returned to a golf playing area if a property owner, the municipality or the county requested that it be retained and if the location had underlying zoning other than for recreational uses such as commercial or residential and was eligible pursuant to N.J.A.C. 7:15-5.24. Although the property is currently zoned for institutional use, no such request was made during the development of the FWSA for Camden County. As a result, upon adotion of the proposed amendment for the Camden Country FWSA map, only the 20 acre area surrounding the club house was included in the SSA.

As indicated, the proposed project property is comprised of institutional zoning. The submitted application for this proposed amendment provided only a concept plan for potential residential development on approximately 50 acres of this 183 acre property. No other development proposal was provided for the remainder of the proposed project property to be returned as SSA. Therefore, the Department determined that, as part of this proposed amendment, no specific project activity has been presented for the entire area proposed for inclusion in the SSA. Furthermore, as describe below, the Department concluded that inclusion of the 99.96 acres as SSA to this site is compliant with N.J.A.C. 7:15-5.24(b), as such, this proposal qualifies as an amendment under the section 6(h) of P.L 2013, c. 188.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version Landscape Project 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e). The Department determined no threatened or endangered species habitat or other priority species habitats were identified on the property.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). A site review of the property determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, Category One (C1) special water resource protection areas are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The Department determined no classified C1 water bodies exist on or near the property.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not proposed as SSA. In accordance with N.J.A.C. 7:15-5.24(e)2, a Letter of Interpretation (LOI) file No. 0409-04-0019, dated May 30, 2014 verified the presence and extent of the regulated wetlands and associated transmittal buffers located within Block 528.01, Lot 11. No area identified as a regulated wetland or buffer is proposed to be returned as SSA on the property as part of this proposed amendment. Consequently, only 99.6 areas within the approximately 183 acre are proposed to be returned as SSA on Block 528.01, Lot 11. In addition, as part of this proposed amendment, approximately one acre area of delineated wetlands within the 20 acres currently approved SSA is proposed to be removed.

In accordance with N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers are excluded from the proposed SSA. All other ESA as defined at N.J.A.C. 7:15-5.24(c) 1-3; lands within certain coastal planning areas (Coastal Fringe, Coastal Rural, and Coastal Environmentally Sensitive Planning Areas) are not applicable to this proposed amendment location nor are any ESA as defined at N.J.A.C. 7:15-5.24(d) 1-4; beaches, costal high hazards area or dunes as defined under N.J.A.C.7:7E.

This proposed amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors, sewers, outfalls, wastewater treatment plants); and development in wetlands flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

This notice is being given to inform the public that a plan amendment has been proposed for the Tri-County WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Department's, Office of Water Resources Management Coordination, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 8:30 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Coordination at (609) 777-4349

Interested persons may submit written comments on the proposed amendment to WQM Program Docket, Office of Water Resources Management Coordination at the Department address cited above with a copy sent to Mr. John Cranmer, Esquire, Cherry Hill Land Associates, LLC, 78 East Main Street, Marlton, NJ 08053. All comments must be submitted within 15 days following the public meeting. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment request.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this notice to WQM Program Docket at the Department address cited above. If a public hearing for the amendment is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

OFFICE OF WATER RESOURCES MANAGEMENT COORDINATION Proposed Amendment to the Monmouth County Water Quality Management Plan Public Notice Harms Pinnacle Sewer Service Area

Take notice that the New Jersey Department of Environmental Protection (Department) is seeking public comment on a proposed amendment to the Monmouth County Water Quality Management (WQM) Plan. This amendment proposal, entitled "Harms and Pinnacle Sewer Service Area", submitted on behalf of Howell Township, would expand the Manasquan River Regional Sewerage Authority MRRSA sewer service area (SSA) by 84.8 acres to allow for the construction of 57 single family homes and the connection of 3 existing single family homes to the MRRSA. This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L 2013, c.188. This preliminary notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15.

The proposed project site is located in Howell Township, Monmouth County on portions of Block 130, Lots 17, 20-22, 57-61. This amendment would allow for the construction of 57 single family homes and the connection of 3 existing single family homes to MRRSA, on the above referenced parcels. The projected

wastewater flow for the proposed new development and existing homes, calculated in accordance with N.J.A.C. 7:14A-23.3, is 18,000 gallons per day (gpd).

As outlined at N.J.A.C. 7:15-5.24, sewer service may only be provided to areas that are not identified as environmentally sensitive areas (ESAs), Coastal Fringe, Coastal Rural and Coastal Environmentally Sensitive Planning Areas, beaches, coastal high hazard areas, and dunes. Pursuant to N.J.A.C. 7:15-5.24, ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. These areas are not included in the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), certain coastal planning areas, not applicable here, must also be excluded from SSA. Specifically, there are no Coastal Fringe Planning Areas, Coastal Rural Planning Areas, or Coastal Environmentally Sensitive Areas on the project site.

In accordance with N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers are excluded from the adopted SSA either where local mapped information exists delineating these areas, or through a narrative description where mapping does not exist, except as provided under N.J.A.C. 7:15-5.24(f)1. Where a narrative approach has been used, it is noted as text on the adopted FWSA map. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of these amendments and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations that prohibit the extension of sewers identified under N.J.A.C. 7:15-5.24(d)1, there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project has been evaluated. The Department has determined that the OCUA Northern Wastewater Pollution Control Facility has adequate available capacity to treat the proposed wastewater flow from this project.

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. Water supply for the proposed development will be provided by the New Jersey American Water Company which is a public water system which withdraws water from the Manasquan Reservoir. The location of the diversion is on Georgia Tavern Road in Howell Township and the water allocation permit number is WAP140001. The existing water allocation permit will not require modification to serve the proposed project

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The county and local governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Howell Township has an adopted stormwater management ordinance (No.0-08-31) which complies with the performance standards of the Stormwater Management Rules at N.J.A.C. 7:8.

In accordance with N.J.A.C. 5.25(h)5, riparian zones are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.25(h)i –vii. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated at N.J.A.C. 7:9B, under the following

regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. In accordance with N.J.A.C. 7:15-5.25(h)5, the proposed project site is not located in a riparian zone

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h), or unless a site has undergone a site specific Habitat Suitability Determination prepared in accordance with N.J.A.C. 7:15-5.26 that found the site to be not suitable habitat, or pursuant with N.J.A.C. 7:15-5.24(g)2, the Department determined the ESA is not critical to a population of endangered or threatened species the loss of which would decrease the likelihood of the survival or recovery of the identified species. Review of the project site has determined that no threatened or endangered species habitat exists on site.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, the Department has determined there are no special water resource protection areas along Category One waters on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation: Line Verification File # 1507-09-0006.1, FWW090001 issued by DLUR on March 11, 2009 was submitted to the Department, confirming that freshwater wetlands and waters are not present on the property and that no part of the above referenced property occurs within a transition area or buffer as designated in N.J.A.C. 7:7A-2.59d) and (e).

In accordance with N.J.A.C. 7:15-5.24(e)2, a Letter of Interpretation (LOI): Line Verification File # 1319-06-0036.1, FWW060001, a Freshwater Wetlands General Permit #1 and Transition Area Waiver FWW060002-FWGP1 issued by the Department on July 19, 2007 was submitted to the Department, confirming that the extent of wetlands and transition area are accurately delineated on the proposed project activity site and confirming that the proposed project meets the requirements for approval to disturb regulated areas pursuant to N.J.A.C. 7:7A-4.3, 5.11, 6.2 and 13.1. The above mentioned approvals remain valid under the Permit Extension Act at N.J.A.C. 7:1B until June 30, 2015. The provisions at N.J.A.C 7:15-5.24(b)4, have been satisfied by the exclusion of the wetlands areas from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope greater than 20 percent. There are no steep slopes on the subject site.

Additional issues which may need to be addressed for any new or expanded wastewater treatment facility proposal include, but are not limited to, compliance with stormwater regulations, antidegradation, effluent limitations, water quality analysis, and exact locations and designs of future treatment works. Additionally, sewer service to any particular project is subject to contractual allocations between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

This notice is being given to inform the public that a plan amendment has been proposed for the Monmouth County WQM Plan. All information related to the WQM Plan and the proposed amendment is located at the Department, Office of Water Resources Management Coordination 401 East State Street, P.O. Box 420, Mail Code 401-02A, 401 East State Street, Trenton, N.J. 08625-0420. The Department's file is available for inspection between 9:00 a.m. and 4:00 p.m., Monday through Friday. An appointment to inspect the documents may be arranged by calling the Office of Water Resources Management Coordination at (609) 777-4349.

Interested persons may submit written comments on the proposed amendment to WQM Program Docket, at the Department address cited above, with a copy sent to Ms. Jennifer Beahm, CME Associates, 1460 Route 9 South, Howell, NJ 07731. All comments must be submitted within 30 days of the date of this public notice. All comments submitted prior to the close of the comment period shall be considered by the Department in reviewing the amendment proposal.

Interested persons may request in writing that the Department hold a non-adversarial public hearing on the amendment or extend the public comment period in this notice up to 30 additional days. These requests must state the nature of the issues to be raised at the proposed hearing or state the reasons why the proposed extension is necessary. These requests must be submitted within 30 days of the date of this notice to WQM Program Docket at the Department address cited above. If a public hearing for the amendment is held, the public comment period in this notice shall be extended to close 15 days after the public hearing.

New Jersey Department of Environmental Protection Water Resources Office of Water Resource Management Coordination Mail Code 401-02A PO Box 420, 401 East State Street Trenton, New Jersey 08625-0420

Notice Regarding Adoption of Site Specific Water Quality Management Plan Amendment Applications Pursuant to P.L.2013, c.188

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Office of Water Resource Management Coordination, has adopted the following Water Quality Management Plan site specific amendment requests pursuant to P.L. 2013, c.188 which was enacted on January 15, 2014. This legislation modifies some aspects of the Water Quality Management Planning Program for a period of two years. P.L. 2013, c.188 directs the Department to accept and process certain site specific amendment proposals despite the absence of a wastewater management plan in compliance with the Water Quality Management Plan rules. Pursuant to the provisions of the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), notices of amendment proposals and the Department's subsequent final action are to be published in the New Jersey Register (NJR). In accordance with P.L. 2013, c.188, notice of adoption of site specific amendments for projects or activities having a wastewater planning flow of less than 50,000 gallons per day (gpd) or being less than 100 acres in size is to be published in the Department of Environmental Protection (DEP) Bulletin.

Notice(s) of adoption of site specific amendment(s) for changes in sewer service area designation, which may include new or expanded wastewater treatment facilities, are individually provided below:

Adopted Amendment to the Tri-County Water Quality Management Plan (WQMP) Public Notice

McTague Estate

Take notice that **February 9, 2015**, pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), an amendment to the Tri-County WQMP was adopted by the Department of Environmental Protection (Department). This amendment submitted on behalf of the James and Hattie McTague Estate, expands the Gloucester County Utilities Authority (GCUA) sewer service area (SSA) by approximately 66 acres to include Block 14901, Lots 22, 23,36-39 and 42 in Monroe Township (Township), Gloucester County. The subject property is located between U.S. Route 322 (Glassboro-Williamstown Road) to the south, and County Route 655 (Fries Mill Road) to the east. The expansion of the SSA will accommodate the proposed development of 25 single family homes and 4,500 square feet of commercial and retail uses.

This amendment updates the GCUA Consolidated District Wastewater Management Plan (WMP), adopted December 10, 2008 (see 41 N.J.R. 671(a), January 20, 2009), to include the James and Hattie McTague Estate Project in the GCUA SSA. This amendment has been reviewed in accordance with the Water Quality Management Planning rules that set the environmental standards to be applied to an amendment at N.J.A.C. 7:15-5.18, N.J.A.C. 7:15-5.24 and N.J.A.C. 7:15-5.25.

Pursuant to P.L. 2011, c. 203, the Department, in consultation with the applicable wastewater management planning agency, may approve the inclusion of land within a SSA notwithstanding that existing treatment works may not currently have the assured capacity to treat wastewater from such land without infrastructure improvements or permit modification. Therefore, amendments to modify a SSA may be approved if such actions are compliant with the applicable sections of the Water Quality Management Planning rule (N.J.A.C. 7:15) regardless of whether capacity has been fully assessed. However, the projected wastewater flow of the project has been evaluated in accordance with N.J.A.C. 7:15-5.25(h)1. The subject development's proposed wastewater flow, calculated in accordance with N.J.A.C. 7:14A-23.3, is 0.00795 million gallons per day (MGD). Currently, the GCUA WWTP (NJDPES #NJ0024686) is permitted to discharge up to 27 MGD of treated wastewater to the Delaware River. Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from GCUA WWTP was calculated to be 19.3 MGD. The addition of the proposed development's projected wastewater flow, estimated as 0.00795 MGD, would not cause the wastewater generation potential of the expanded SSA to exceed the permitted capacity of the GCUA WWTP.

In accordance with N.J.A.C. 7:15-5.24 and 5.25, environmentally sensitive areas (ESAs) have been assessed to determine what areas of the project are appropriate for inclusion in the proposed SSA. ESAs evaluated include, but are not limited to: habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, riparian zones, wetlands, steep slopes, Coastal Fringe, Coastal Rural and Coastal Environmentally Sensitive Planning Areas, beaches, coastal high hazard areas, and dunes.

Pursuant to N.J.A.C. 7:15-5.24, ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. These ESAs are not included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h), or unless a site has undergone a site specific Habitat Suitability Determination prepared in accordance with N.J.A.C. 7:15-5.26 that found the site to be not suitable habitat, or pursuant with N.J.A.C. 7:15-5.24(g)2, the Department determined the ESA is not critical to a population of endangered or threatened species the loss of which would decrease the likelihood of the survival or recovery of the identified species. Review of the project site has determined that no threatened or endangered species habitat exists on site.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). The project site is within the Downer Natural Heritage Priority Site. The Downer Natural Heritage Priority Site (NHPS) lies in parts of Monroe and Washington Townships, Gloucester County. The area mapped contains more than 1,000 acres. The primary area of concern is a red maple/Atlantic white cedar swamp with sphagnous spring seeps that follow the Beaverdam Branch of the Maurice River. Primary bounds for the NHPS site include the extent of the documented wetland habitat for rare plant species. Secondary bounds include additional wetlands along with other lands draining toward the wetlands, which may benefit from careful watershed management. The McTague property lies within the secondary boundary.

The Department has determined that the McTague property does not contain suitable habitat for Swamp Pink and that suitable habitat documented for Swamp Pink lies offsite. In accordance with N.J.A.C. 7:15-5.24 (g)2., the Department finds that environmentally sensitive areas proposed to be included in the sewer service area are not critical to a population of endangered or threatened species, the loss of which would decrease the likelihood of the survival or recovery of the species in the State.

A plan of one sheet entitled "Plan of Sewer Service Area Addition situate Block 14901, lots 22,23,36-39 &42, Township of Monroe, Gloucester County, New Jersey" dated 12/17/13, not revised, signed and sealed by Gary R. Civalier, P.E. and L.S. depicts the area on the site which may be included with the GCUA SSA.

In accordance with N.J.A.C. 7:15-5.25(h)5i, riparian zones shall be protected. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). In accordance with N.J.A.C. 7:15-5.24(e)2, Letter of Interpretation (LOI) # 0811-09-0001.1 FWW 090001, dated April 2, 2009 was submitted. Areas subject to those LOIs which were delineated as wetlands, including any associated buffers, are not included in the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope greater than 20 percent. There are no steep slopes on the subject site.

In accordance with N.J.A.C. 7:15-5.24(c), lands within certain coastal planning areas (Coastal Fringe, Coastal Rural, and Coastal Environmentally Sensitive Planning Areas) are not included in the SSA. The project site is not in a coastal planning area.

In accordance with N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers to serve development in specified areas such as wetlands and floodplains are excluded from proposed SSAs. There are no grant conditions for this site.

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. The proposed project would be served by the public water supply provided by the Monroe Township Municipal Utilities Authority which is currently permitted under water allocation permit number WAP 100001 and PWSID No.: 0811002 to allocate 143.690 million gallons per month (MGM) and currently has a water supply surplus of 12.024 MGM. The proposed water demand of the project, calculated in accordance with N.J.A.C. 7:15-5.25(f)1i, is 0.00798 MGM; therefore, sufficient water supply is available to serve the proposed development within the existing water allocation permit.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. Compliance with this standard shall be demonstrated by the adoption of a municipal stormwater management ordinance that conforms with the requirements of N.J.A.C. 7:8 (Stormwater Management Rules). The Township of Monroe has adopted stormwater management ordinance Section 175-40 of Chapter 175 of the Monroe Township Municipal Code, entitled Land Management, which complies with the performance standards of the Stormwater Management Rules. Consequently the requirements of N.J.A.C. 7:15-5.25(g)1 for stormwater control have been satisfied.

This amendment proposal was noticed in the New Jersey Bulletin on November 19, 2014 at Volume 38, Issue 22 as well as the South Jersey Times, and no comments were received during the comment period.

This amendment represents only one part of the permit process and other issues may need to be addressed prior to final permit issuance. Additional issues which may need to be addressed may include, but are not limited to, the following: compliance with stormwater regulations; antidegradation; effluent limitations; water quality analysis; exact locations and designs of future treatment works (pump stations, interceptors, sewers, outfalls, wastewater treatment plants); and development in wetlands, flood prone areas, designated Wild and Scenic River areas, or other environmentally sensitive areas which are subject to regulation under Federal or State statutes or rules.

Adopted Amendment to the Ocean County Water Quality Management Plan

Public Notice

Lacey Affordable Apartments

Take notice that on **February 9, 2015** pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 et seq., and the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), the Department of Environmental Protection (Department) adopted an amendment to the Ocean County WQMP. This amendment, entitled "Lacey Affordable Apartments", submitted on behalf of Lacey Township, expands the Ocean County Utilities Authority (OCUA) sewer service area (SSA) by 3 acres to allow for the construction of an affordable housing apartment complex.

The proposed project site is located in Lacey Township, Ocean County on Block 1837, Lots 8.02 and 9 on the west side of Municipal Lane. This amendment allows for the construction of 70 apartment units with a total of 13 one-bedroom apartments, 43 two-bedroom apartments, 14 three-bedroom apartments; a maintenance building and a rental office/clubhouse on the above referenced parcels. This project has received a Coastal Area Facility Review Act (CAFRA) individual permit, No. 1512-03-0019.1, from the Department's Division of Land Use Regulation (DLUR) on July 23, 2014. The projected wastewater flow for the proposed new development, calculated in accordance with N.J.A.C. 7:14A-23.3 is 16,091 gallons per day (gpd).

This proposed amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L 2013, c.188. This preliminary notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15.

As outlined at N.J.A.C. 7:15-5.24, sewer service may only be provided to areas that are not identified as environmentally sensitive areas (ESAs), Coastal Fringe, Coastal Rural and Coastal Environmentally Sensitive Planning Areas, beaches, coastal high hazard areas, and dunes. Pursuant to N.J.A.C. 7:15-5.24, ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. Review of the proposed project site has determined that there are no ESA's identified on the portion of the parcels proposed to be included in the sewer service area.

Pursuant to N.J.A.C. 7:15-5.24(c), certain coastal planning areas, not applicable here, must also be excluded from SSA. Specifically, there are no Coastal Fringe Planning Areas, Coastal Rural Planning Areas, or Coastal Environmentally Sensitive Areas on the property.

In accordance with N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers are excluded from the adopted SSA either where local mapped information exists delineating these areas, or through a narrative description where mapping does not exist, except as provided under N.J.A.C. 7:15-5.24(f)1. Where a narrative approach has been used, it is noted as text on the adopted FWSA map. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of these amendments and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations that prohibit the extension of sewers identified under N.J.A.C. 7:15-5.24(d)1, there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the property.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project has been evaluated. The Department has determined that the OCUA Central Water Pollution Control Facility (WPCF) has adequate available capacity to treat the proposed wastewater flow from this project. The projected wastewater flow for the proposed new development, calculated in accordance with N.J.A.C. 7:14A-23.3 is 16,091 gallons per day (gpd). Currently the OCUA Central WPCF (NJ0029408) is permitted to discharge up to 32 Million Gallons per day (MGD) of treated wastewater to the Atlantic Ocean. Based on an average of the monthly average flow for the most recent twelve month period for which discharge monitoring data is available, the existing wastewater flow discharged from the OCUA Central WPCF was calculated to be 20.59 MGD. The addition of the proposed development's projected wastewater flow would not cause the wastewater generation potential of the expaned SSA to exceed the permitted capacity of the OCUA Central WPCF.

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed project has been evaluated. Water supply for the proposed development on the property will be provided by the Lacey Township Municipal Utilities Authority which is a public water system which withdraws water from the Kirkwood-Cohansey and Atlantic City 800 Foot Sands aquifer. It is currently permitted under PWSID No. 1512001. to allocate 112.7 million gallons per month (MGM) and has a water supply surplus of 13.766 MGM. The proposed water demand of the project, calculated in accordance with N.J.A.C. 7:15-5.25(f)1i, is

0.41 MGM; therefore sufficient water supply is available to serve the proposed development within the existing water allocation permit.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information, a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The county and local governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Lacey Township has an adopted stormwater management ordinance (No. 23-Jun) which complies with the performance standards of the Stormwater Management Rules at N.J.A.C. 7:8.

In accordance with N.J.A.C. 5.25(h)5, riparian zones are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.25(h)i –vii. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. Review of the proposed project site has determined that no riparian zones exist on site.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope greater than 20 percent. There are no steep slopes on the subject site.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h), or unless a site has undergone a site specific Habitat Suitability Determination prepared in accordance with N.J.A.C. 7:15-5.26 that found the site to be not suitable habitat, or pursuant with N.J.A.C. 7:15-5.24(g)2, the Department determined the ESA is not critical to a population of endangered or threatened species the loss of which would decrease the likelihood of the survival or recovery of the identified species.

Upon initial review of the proposed project site, the Department has determined that a portion of the site was identified as Barred Owl habitat. The habitat concerns were addressed during the review of the above mentioned CAFRA application. The Department concurred with the applicant's Environmental Compliance Report and Endangered or Threatened Wildlife Species Habitat Evaluation which cited "an absence of freshwater wetland communities; structural inadequacy of upland vegetation communities; absence of potentially suitable nesting cavities; fragmented suburban landscape; potential competitor/predator influences; and, a high level of human disturbance"; thereby concluding that the parcels in question do not provide suitable Barred Owl habitat.

The Department also reviewed Critical Wildlife Habitat (CWH) as part of their CAFRA permit review in accordance with N.J.A.C. 7:7E-3.39. CWH are specific areas known to serve an essential role in maintaining wildlife, particularly in wintering, breeding and migrating. Based on guidance received from the NJ Division of Fish and Wildlife's Endangered and Nongame Species Program (ENSP), the Department considers patches of woody vegetation along the Atlantic seaboard to serve a critical role in providing resting and foraging habitat for migratory birds. Within the coastal zone mainland, patches of woody vegetation equivalent to 20 acres in size, and greater, function as migratory bird stopover habitat.

The proposed project site is located within a large woodland complex identified by the Department's Land Use Land Cover (2007) mapping. Through an analysis of current aerial photography and Land Use Land Cover mapping, the Department has determined that the extent of the woodland complex is greater than 139 acres. As a result, the woodland community associated with the parcel in question exceeds the minimum patch size identified as a characteristic of migratory songbird habitat. The applicant has submitted documentation which is in agreement with this finding.

As part of the CAFRA permit review, the Department determined that approximately 4.48 acres of forest (woodland community) could be cleared. The Department has taken into consideration the amount of tree preservation that will remain on site, however the CAFRA rule states that development that would directly, or through secondary impacts on the relevant site, or in the surrounding regions adversely affect CWH is "discouraged", unless the proposal includes appropriate mitigation measures. To demonstrate compliance with N.J.A.C. 7:7E-3.39, the applicant submitted a proposal to mitigate for the loss of CWH by offering 5.21 acres of land off-site to be deed restricted in the future. The Department has determined that the proposal is acceptable for mitigation and therefore, a conditional compliance with Critical Wildlife Habitat is met. The CAFRA permit specifies that this mitigation proposal must be submitted to the Department for review and approval within 90 days of the issuance of the CAFRA permit. In addition, the CAFRA permit specifies that within 90 days of the issuance of the permit, the property owner shall sign a Department approved conservation restriction for an on site 1.89 acre tree preservation area. The tree preservation area, which will be located on the southern half of Block 1837, Lot 9, is identified on the applicant's July 7, 2014 site plan submitted as part of their WQM Amendment application.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the proposed project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) through (h). Review of the proposed project site has determined that no wetlands or wetlands buffers exist on site.

This amendment proposal was noticed in the Department Bulletin on December 3, 2014, Volume 38 Issue 23, pages 9-12, and no comments were received during the comment period.

Additional issues which may need to be addressed for any new or expanded wastewater treatment facility proposal include, but are not limited to, compliance with storm water regulations, anti-degradation, effluent limitations, water quality analysis, and exact locations and designs of future treatment works. Additionally, sewer service to any particular project is subject to contractual allocations between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

Adopted Amendment to the Monmouth County Water Quality Management Plan Public Notice Harbor Road WTP

Take notice that on **February 9, 2015** pursuant to the provisions of the New Jersey Water Quality Planning Act, N.J.S.A. 58:11A-1 <u>et seq.</u>, and the Statewide Water Quality Management Planning rules (N.J.A.C. 7:15-3.4), the Department of Environmental Protection (Department) adopted an amendment to the Monmouth County WQMP. This amendment, entitled "Harbor Road Water Treatment Plant", submitted on behalf of the Western Monmouth Utilities Authority (WMUA), expands the WMUA's Pine Brook Treatment

Plant sewer service area (SSA) by 9.24 acres to include a portion of Block 171, Lot 71 located in Marlboro Township, Monmouth County. The expansion would allow for the abandonment of an existing septic system that presently treats the Harbor Road Drinking Water Treatment Plant's (WTP) sanitary wastewater. In addition, sludge that is currently treated by onsite backwash lagoons is proposed to be discharged to the WMUA collection system and conveyed to the Pine Brook Treatment Plant. This amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L 2013, c.188. This notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15.

This amendment has been reviewed in accordance with the Water Quality Management Planning rules at N.J.A.C. 7:15 and P.L 2013, c.188. This notice represents the Department's determination that the proposed amendment is in compliance with the regulatory criteria pursuant to N.J.A.C. 7:15.

The proposed project site, located south of Harbor Road and west of Route 79, is currently identified as Individual Subsurface Sewage Disposal System (ISSDS) area for wastewater flows of less than 2,000 gallons per day (gpd) as designated on the Monmouth County Future Wastewater Service Area Map FWSA map. The parcel currently includes the existing above referenced WTP, which has undergone recent water quality treatment upgrades and the installation of on-site solar panel array. The projected wastewater flow as a result of the proposed connection to the Pine Brook Treatment Plant, calculated in accordance with N.J.A.C. 7:14A-23.3, is 20,000 gallons per day (gpd).

As outlined at N.J.A.C. 7:15-5.24, sewer service may only be provided to areas that are not identified as environmentally sensitive areas (ESAs), Coastal Fringe, Coastal Rural and Coastal Environmentally Sensitive Planning Areas, beaches, coastal high hazard areas, and dunes. Pursuant to N.J.A.C. 7:15-5.24, ESAs are defined as contiguous areas of 25 acres or larger consisting of habitat for threatened and endangered species as identified on the Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, Natural Heritage Priority Sites, Category One (C1) special water resource protection areas, and wetlands, alone or in combination. These areas are not included in the proposed SSA.

Pursuant to N.J.A.C. 7:15-5.24(c), certain coastal planning areas, not applicable here, must also be excluded from SSA. Specifically, there are no Coastal Fringe Planning Areas, Coastal Rural Planning Areas, or Coastal Environmentally Sensitive Areas on the proposed project site.

In accordance with N.J.A.C. 7:15-5.24(d)1, areas with Federal 201 grant limitations that prohibit the extension of sewers are excluded from the adopted SSA either where local mapped information exists delineating these areas, or through a narrative description where mapping does not exist, except as provided under N.J.A.C. 7:15-5.24(f)1. Where a narrative approach has been used, it is noted as text on the adopted FWSA map. Pre-existing grant conditions and requirements (from Federal and State grants or loans for sewerage facilities), which provide for restriction of sewer service to environmentally sensitive areas, are unaffected by adoption of these amendments and compliance is required.

In addition to the environmentally sensitive areas with Federal 201 grant limitations that prohibit the extension of sewers identified under N.J.A.C. 7:15-5.24(d)1, there are other special restricted areas, not applicable here, which must also be excluded from SSA pursuant to N.J.A.C. 7:15-5.24(d)2 through 4. Specifically, there are no beaches, coastal high hazard areas, or dunes on the project site.

In accordance with N.J.A.C. 7:15-5.25(h)1, the projected wastewater flow of the project has been evaluated. The Department has determined that the WMUA's Pine Brook Treatment Plant has adequate available capacity to treat the proposed wastewater flow from this project.

In accordance with N.J.A.C. 7:15-5.25(h)3 the water supply need for the proposed amendment has been evaluated. There is no additional water supply demand. The subject parcel, Block 171, Lot 71 is already served by the Marlboro Township Municipal Utilities Authority which is a public water system which withdraws water from the Farrington Aquifer. The location of the diversion on Harbor Road and the water allocation permit number is WAP030001, program I.D. 5055. The existing water allocation permit will not require modification to serve the proposed amendment.

In accordance with N.J.A.C. 7:15-5.25(h)4, a project or activity's stormwater management is to be evaluated. However, P.L. 2013, c. 188 directs that there is a presumption that an engineered subdivision or site plan is not required. Without such information a review and determination of compliance with the Stormwater Management rules (N.J.A.C. 7:8) is not possible. The county and local governments are responsible for review and implementation of the Stormwater Management rules during their review and approval of proposed development. Marlboro Township has an adopted stormwater management ordinance (No. 2006-21) which complies with the performance standards of the Stormwater Management Rules at N.J.A.C. 7:8.

In accordance with N.J.A.C. 5.25(h)5, a riparian zone has been identified on the proposed project site as the tributary to the Deep Run (FW2-NT) that borders the southern edge of the property. Riparian zones or buffers are established along all surface waters, based on the surface water body's classification designated at N.J.A.C. 7:9B, under the following regulations: the Flood Hazard Area Control Act Rules, the Stormwater Management rules, and the Water Quality Management Planning rules. The required buffer width for Deep Run is 50 feet. In accordance with N.J.A.C. 7:15-5.25(h)5i, the Riparian Corridor Analysis has been satisfied by the exclusion of the buffer area from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.24(b)1, to determine areas designated as threatened or endangered species habitat, the Department utilized the Division of Fish and Wildlife's Landscape Project Maps of Habitat for Endangered, Threatened or Other Priority Species, version 3.1. Areas identified by the Landscape Project as being suitable habitat for threatened and endangered species Ranks 3 (State threatened), 4 (State endangered), and 5 (Federal endangered or threatened) are not to be included in proposed SSAs except as provided under N.J.A.C. 7:15-5.24(e) – (h), or unless a site has undergone a site specific Habitat Suitability Determination prepared in accordance with N.J.A.C. 7:15-5.26 that found the site to be not suitable habitat, or pursuant with N.J.A.C. 7:15-5.24(g)2, the Department determined the ESA is not critical to a population of endangered or threatened species, the loss of which would decrease the likelihood of the survival or recovery of the identified species. Review of the project site has determined that no threatened or endangered species habitat exists on site.

In accordance with N.J.A.C. 7:15-5.24(b)2, areas mapped as Natural Heritage Priority Sites are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Review of the project site has determined that no Natural Heritage Priority Sites exist on site.

In accordance with N.J.A.C. 7:15-5.24(b)3, the Department has determined there are no special water resource protection areas along Category One waters on the site.

In accordance with N.J.A.C. 7:15-5.24(b)4, areas mapped as wetlands pursuant to N.J.S.A. 13:9A-1 and 13:9B-25 are not to be included in proposed SSAs, except as provided under N.J.A.C. 7:15-5.24(e) – (h). Wetlands have been identified on the proposed project site along the southern edge of the property. The provisions at N.J.A.C 7:15-5.24(b)4, have been satisfied by the exclusion of the wetlands areas from the proposed SSA.

In accordance with N.J.A.C. 7:15-5.25(h)6, proposed development disturbance is not to be located in areas with steep slopes, defined as any slope greater than 20 percent. There are no steep slopes on the proposed project site.

This amendment proposal was noticed in the Department Bulletin on November 5, 2014, Volume 38 Issue 21, pages 9-11, and no comments were received during the comment period.

Additional issues which may need to be addressed for any new or expanded wastewater treatment facility proposal include, but are not limited to, compliance with stormwater regulations, antidegradation, effluent limitations, water quality analysis, and exact locations and designs of future treatment works. Additionally, sewer service to any particular project is subject to contractual allocations between municipalities, authorities and/or private parties, and is not guaranteed by this amendment.

Approval of this amendment does not eliminate the need for any permits, approvals or certifications required by any Federal, State, County or municipal review agency with jurisdiction over this project/activity.

NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION DIVISION OF WATER QUALITY PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes either:

- 1. 30 calendar days after publication of the last newspaper notice when a notice is published in the DEP Bulletin *and* a newspaper(s); or
- 2. 30 calendar days after publication of the DEP Bulletin notice when a notice is published in the DEP Bulletin *only*.

All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

Written comments should be submitted to the appropriate permitting bureau:

Pilar Patterson, Chief Mail Code 401-02B Bureau Surface Water Permitting PO Box 420 Trenton, NJ 08625-0420 James J. Murphy, Chief Mail Code 401-02B Bureau of Nonpoint Pollution Control PO Box 420 Trenton, NJ 08625-0420

Anthony Pilawski/Tim Doutt Mail Code 401-02B Bureau of Pretreatment and Residuals PO Box 420 Trenton, NJ 08625-0420

Public Notice of Proposed Permit Actions - 02/18/2015 (Division of Water Quality)

	(Division of Water Quality)							
Permit: Name NJPDES No. Type	Facility Location: • Address • County	NJDEP: • Case manager • Bureau • Phone No.	Receiving Discharge: • Stream or GW Formation or POTW • Stream or GW Classification • Watershed	Executive Summary				
TRAVEL CENTERS OF AMERICA NJ0109681 DGW	975 Rt 173 Bloomsbury, NJ 08804 Hunterdon County	Mike Pigliacelli Bureau of Nonpoint Pollution Control (609)633-7021	Jacksonberg II-A	Ground Water Renewal Permit Action The facility is a national travel center chain, which provides services to highway travelers. The facility's services include a retail store with built-in game room, two restaurants with eat-in dining availability, public showers, laundry and restroom facilities, a parking area for trucks, certified weigh scales, refueling stations for trucks and cars, as well as maintenance and repair of trucks. Stormwater from industrial areas flows into a detention pond which is monitored via an on-site well.				
SOUTH MONMOUTH REGIONAL STP NJ0024562 DSW Major	1235 18th Ave Wall Twp, NJ 07719 Monmouth County	Rachael Pepe Bureau of Surface Water Permitting (609)292-4860	Atlantic Ocean SC(C2) Atlantic Coast (Whale Pond to Manasquan)	Surface Water Renewal Permit Action The existing facility discharges treated, disinfected, domestic wastewater into the Atlantic Ocean, which is classified as SC waters. The existing facility has a NJPDES flow value of 9.1 million gallons per day (MGD) and currently discharges a monthly average flow of approximately 5.3 MGD. This action proposes effluent limitations based on a flow of 9.1 MGD. Treatment units consist of a bar screen, aeration grit removal chambers, primary clarification tanks, trickling filter tanks, secondary clarification tanks, chlorine disinfection tank and aeration and stabilization ponds.				
SUSSEX CNTY VO TECH HS NJ0050806 DGW	105 N Church Rd Sparta, NJ 07871-0000 Sussex County	Keith Howell Bureau of Nonpoint Pollution Control (609)633-7021	Jacksonberg II-A	Ground Water Renewal Permit Action Sussex County Technical School has submitted a renewal application for a NJDEP-DGW permit. This facility is comprised of 1,200 students including faculty. Sanitary wastewater generated by this facility is treated by an on-site wastewater treatment system. The maximum permitted discharge for this facility is 18,000 gallons per day of treated sanitary wastewater.				
NJPDES MASTER GENERAL PERMIT PROGRAM INTEREST NJ0132519 RES	401 E State St Trenton, NJ 08625 Mercer County	Alan Workman Bureau of Pretreatment and Residuals (609)633-3823		Residual Master General Permit Renewal The general permit will establish minimum conditions for temporarily storing liquid s.s. (which includes domestic septage) and grease (which meets the definition of a domestic pollutant) prior to transfer to duly permitted or approved residuals mgmt. op.'s for ult. mgmt. Can be any operation, device or system at which liquid s.s. is transferred from collection vehicles to any type of permanent/fixed on-site storage unit (this includes fixed frac tanks) and then to haulage vehicles. This permit excludes facilities w/ greater than 50,000 gallons of storage, facilities that perform treatment, & facilities that accept dewatered or industrial residuals.				

FRENCH'S FOOD COMPANY NJ0167495 DGW	4 Mill Ridge Lane Chester, NJ 07930 Morris County	Keith Howell Bureau of Nonpoint Pollution Control (609)633-7021	Glacial Till II-A	Ground Water Renewal Permit Action French's Food Company has submitted a renewal NJPDES-DGW application. This facility is a commercial office complex with a total square footage of 32,000ft. This office complex utilizes 2 septic systems and 2 subsurface disposal beds for a total flow of 4,000 gallons per day.
ATLANTIC CITY MUA NJ0174360 RES	1151 N Main St Pleasantville, NJ 08232 Atlantic County	Patrick Brown Bureau of Pretreatment and Residuals (609)633-3823		Residual Renewal Permit Action Water treatment residuals (WTR) generated during the production of potable water at the Atlantic City MUA Water Plant located in Pleasantville, NJ are directly land applied to lands with suitable soils and mixed with soil and other aggregates on-site and off-site to produce topsoil blends. Approximately 4,000 cubic yards per year of WTR are proposed to be distributed for land application. This permit renewal proposes to continue existing operations.
CSX INTERMODAL SOUTH KEARNY TERMINAL NJ0222682 DST	700 Old Fish House Rd Kearny Town, NJ 07032 Hudson County	Daniel Kuti Bureau of Nonpoint Pollution Control (609)633-7021	Passaic River SE3(C2) Passaic River Lower (Nwk Bay to Saddle)	Stormwater Discharge New Permit Action CSX Intermodal has applied for a new individual stormwater permit for the south Kearny operation. The facility is involved with the transfer of shipping containers from rail to trucks, as well as the maintenance of the involved equipment. The facility discharges storm water runoff to both the Hackensack and Passaic rivers. The Department intends to issue the facility a new individual storm water permit.

The following minor modifications and administrative permit revocations were recently issued. These actions are listed for informational purposes only and are <u>not</u> open for public comment.
